
Assurance Practice

Our assurance practice helps clients manage risk to better focus on their core business. By understanding each client's business, we convert information into insights that help clients uncover hidden opportunities to improve their business performance.

Since 9 March 2004, we have registered with the US Public Companies Accounting Oversight Board, (PCAOB), which was created by the Sarbanes-Oxley Act of 2002 to oversee audits of public companies listed with the SEC, in order to protect the interests of investors. Horwath Belize is the only firm in Belize that has registered with the PCAOB.

Horwath Belize LLP provides the assurance services you need, including:

- Auditing and reporting on financial statements in accordance with PCAOB standards, IFRS, UK and Canadian Standards.
- Internal audit outsourcing
- Reviews and compilations
- Forecasts and projections
- Financial information systems reviews
- Evaluating/testing accounting and internal control systems

For more information on our assurance practice, please contact Stanley Ermeav at ealp@btl.net today.
